March 8, 2017

Dear Property Owner:

SUBJECT: ID 3360-09-72  
Maple Road to WIS 60  
WIS 175  
Washington County

WIS 175 resurface improvements will include mill and overlay of existing asphalt pavement and the reconstruction of all intersections including a roundabout at Lannon Road and WIS 175. Retaining walls will be added along with curb & gutter at Meeker Hill, a new box culvert at Willow Creek, along with new pavement marking and signing. The project is 9 miles in length and will be completed in early November. The prime contractor is Michels Corporation from Brownsville, Wisconsin and was awarded the project for \$ 8.7M.

Stage 1 will include work from Willow Creek to Beechwood Industrial Court and from the Richfield Fire House north to WIS 60.

Stage 2 will include the box culvert at Willow Creek and the roundabout and the roadway to the south project limits at Germantown. This work will begin after June 20th in conclusion of the U.S. Open at Erin Hills. The bridge work will take approximately 4 - 6 weeks. There will be a complete closure of Lannon Road and WIS 175 for fifteen consecutive days in August to complete the interior of the roundabout.

Posted Detour: Stage 1 – CTH Y (Lannon Road) to I-41 to WIS 60  
Stage 2 – CTH Q (County Line) to I-41 to WIS 60

Every ditch and shoulder will be reshaped on WIS 175. If you have existing field drain tile, please contact me so we can perpetuate flow to the new ditches.

Removal of mail boxes and fire numbers are your responsibility and **not** the contractors. You will have to relocate both for the duration of the project. Mailboxes on side roads that will be reconstructed will also have to be removed.

*Slinger Post Office* will be notifying residents on where to temporarily relocate the mailboxes. A notification will be placed in your mailbox. Richfield, Hubertus & Germantown residents will need to contact the *Germantown Post Office* at 262.251.6411. Residents with a Jackson zip code will contact the *Jackson Post Office* at 262.677.4078. As a request from the Post Office's I have included this information.

If this is a rental property, you must inform your renters. The mailing list information is from the 2015 tax key.

Mailboxes and fire numbers will have to be moved by **Monday, March 20<sup>th</sup>**. Mailboxes can be erected in a bucket filled with stone and are required to have a house number. Please place in number order to aid the carrier. Residents receiving a newspaper will also have to contact the carrier

to let them know the new location of the mailbox. If your neighbor is elderly, please make an attempt to help them through this process. You will be notified when the mailbox can be reset, along with a brochure on proper height and distance from the shoulder or curb & gutter.

WIS 175 will remain open to local traffic during the duration of the project. This means access to your home or business, deliveries, school bus, garbage pick-up and emergency equipment will be maintained. Utilizing closest side roads to access WIS 175 is desired.

Driving at a reduced speed will make it safer for everyone concerned. When the bridge and roundabout are under construction, local traffic can use existing side roads. The box culvert replacement will take approximately 4 - 6 weeks. Traffic has to be minimized in order for the contractor to complete the work.

If you have any questions or requests, please contact Jeanne Marchant, Project Leader. My field office is located at 3060 Hubertus Road, and my phone number is 262.328.5114. My work hours are 7 - 5, however, I will be able to stay after hours if need be.

*Jeanne A Marchant*
